

Komponente ida ne'e fornese fonte fini ba sistema no prosedimentu kontrollu nesesáriu atu nune'e fini qualidade deit mak móvel através iha sistema.

(This component provides source seed for the system and the necessary control procedures so that only quality seed is moving through the system.)

Teste Fini (Seed testing)

Laboratóriu Fini Nasionál estabelese iha tinan 2013 hatudu ona funsaun importante iha garante qualidade fini ba variedade ne'ebé lansa liu husi fornese teste ofisiál ba fini sertifikadu no fini komersiál ne'ebé produs iha rai laran. Teste fini rutina hanesan konteúdu umidade fini, pureza fíziku fini, no jermi-nasaun fini bele hala'o iha laboratóriu.

(The National Seed laboratory established in 2013 has played an important role in seed quality assurance for the released varieties by providing official seed testing of certified and commercial seed produced in the country. Routine seed testing such as seed moisture content, physical seed purity, and seed germination test can be done in the laboratory.)

<i>Klase fini</i> <i>Seed class</i>	<i>Kuantidade</i> <i>Quantity</i>	<i>Produs husi</i> <i>Produced by</i>	<i>Pureza fíziku</i> <i>Physical purity</i>	<i>Objetivu</i> <i>Purpose</i>
Breeder seed <i>Breeder seed</i>	↓	Ministério da Agricultura e Pescas <i>Ministry of Agriculture and Fisheries</i>	99.9%	Habarak fini <i>Seed production</i>
