

**ADAPTIVE DEVELOPMENT MANAGEMENT**

**Step 1:** Situation Assessment

**Step 2:** Framework and Action Planning

**Step 3:** Implementing and Monitoring

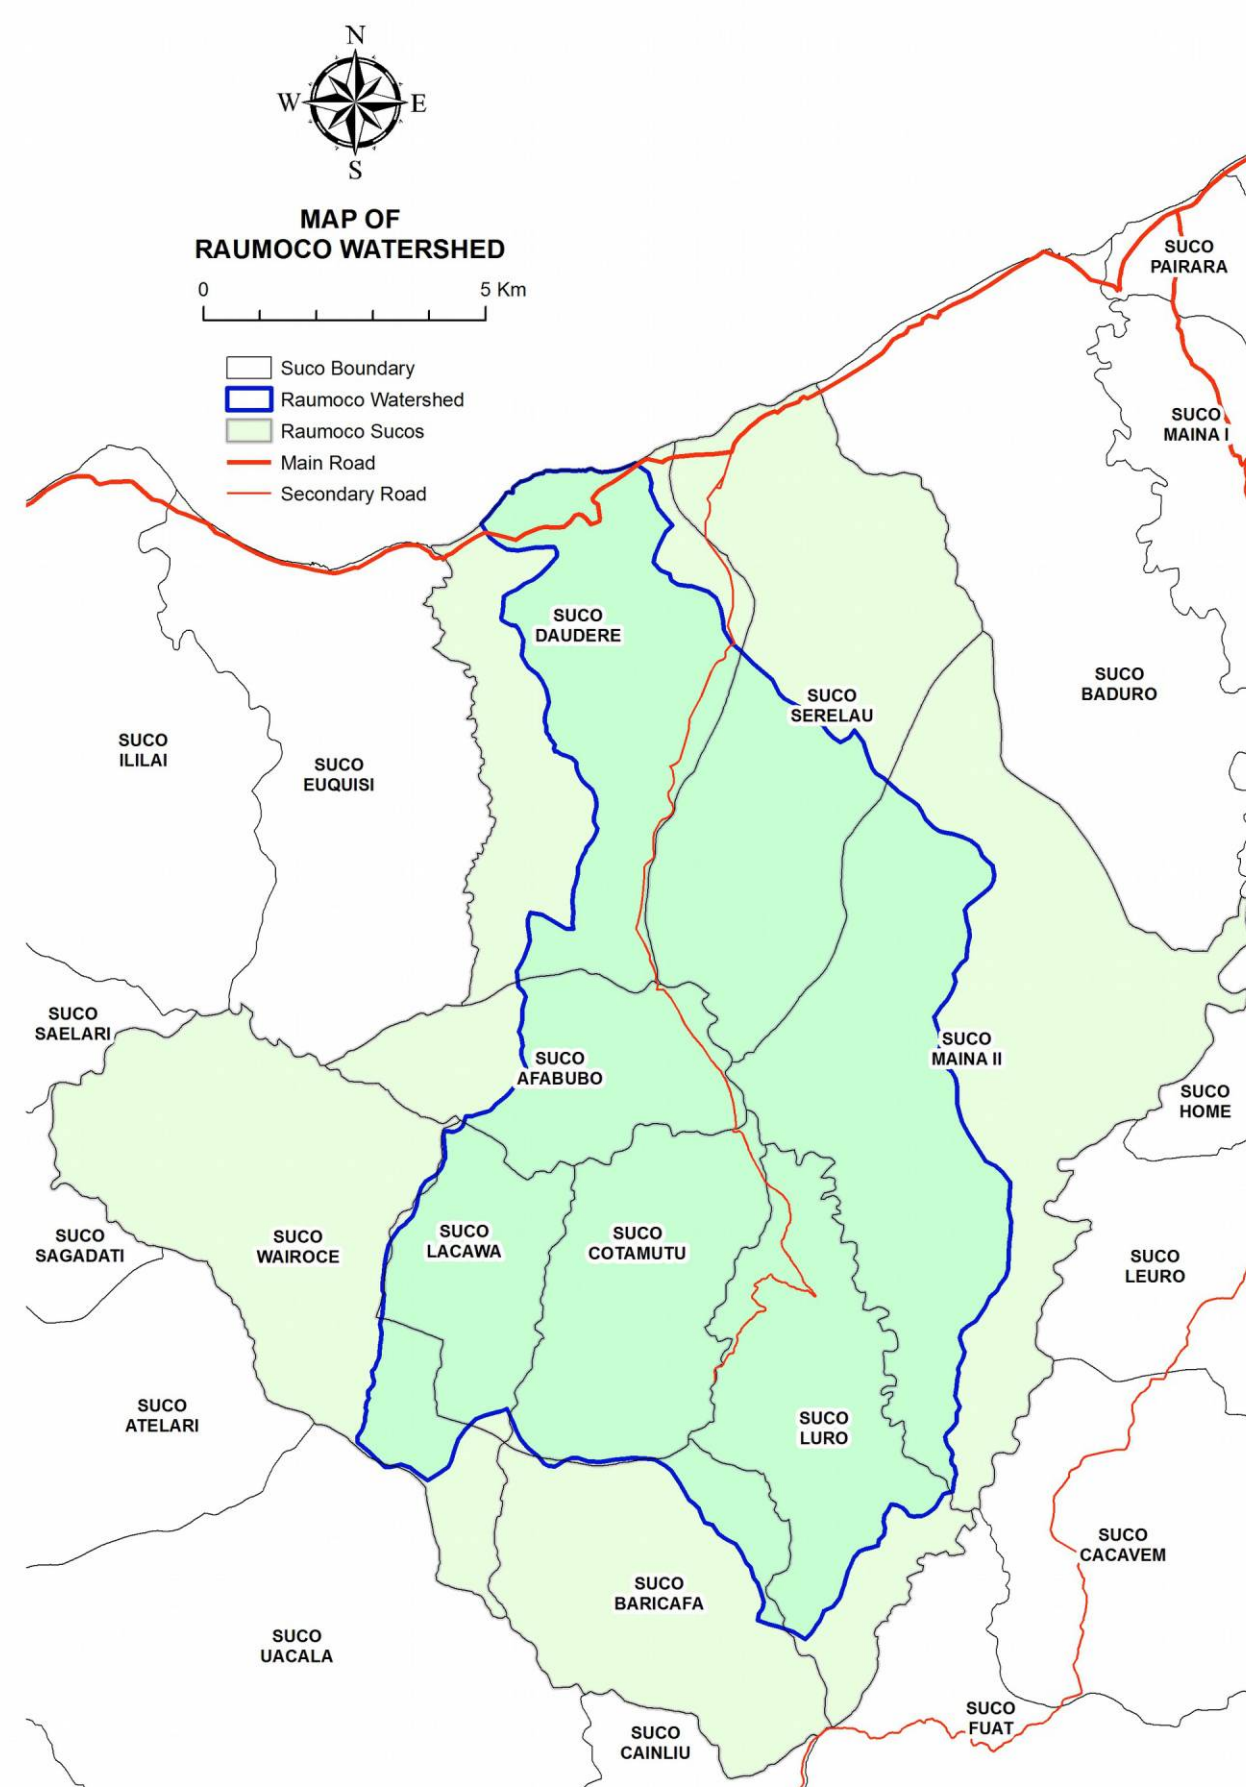

**Step 4:** Reviewing, Evaluating & Re-planning

- 

The diagram illustrates the relationship between two hierarchical structures:

- Hierarchies of Governance (Left):** A vertical stack of three levels:
  - National Agencies** (top, olive green)
  - District Agencies** (middle, light green)
  - Suco Councils, Communities, Groups & Families** (bottom, dark green)
 Arrows indicate flow: blue arrows point down from National to District Agencies; orange, green, and yellow arrows point up from District Agencies to National Agencies; blue, orange, and yellow arrows point down from District Agencies to Suco Councils.
- Hierarchies of Development Management (Right):** A vertical stack of three levels, each within a colored oval:
  - Policy, Program design and management. Some technical supervision.** (top, olive green)
  - District Development Management Service delivery. Capability building. Technical support.** (middle, light green)
  - Suco Development Management Community engagement and capability building through experiential learning & empowerment** (bottom, dark green)
- Interconnections:**
  - A light blue arrow labeled "Plans, \$" points from National Agencies to Policy.
  - An orange arrow labeled "Plans, \$, Services" points from District Agencies to District Development Management.
  - A large, faint blue arrow points from the entire Governance structure towards the Development Management structure.

- improved livelihoods and lifestyles of each community resulting from improved and sustainable productivity of their *natural resource* endowment, and
- operational linkages with service providers that address the other non-agricultural development constraints they identify such as road access, reliable potable water, improved sanitation, education and nutrition.
